### Rubella Serology

Rubella IgG	238	IU/mL
-------------	-----	-------

Comment(s) for Date : 24/08/2011 Time : 11:45 Episode : 15745843

Rubella serology: IgG greater than 10 IU/mL is consistent with past infection or immunisation. It is probably protective of the foetus in a pregnant patient. If recent infection is suspected, suggest follow-up Rubella serology (IgG & IgM) in 7-10 days.
